Reprint from 'The Lancet,' September 15th, 1901 :---We have previously reported upon a sample of condensed milk prepared by the Swiss Milk Society which, unlike the present sample, contained no added sugar. There is no doubt that the addition of sugar to condensed milk is in most cases excessive. On the contrary, when this preparation is diluted to a desirable strength by adding, for example, three parts of water to one part of milk there is hardly any sweet taste of added sugar, perceptible. The preparetion is quite fluid, and does not crystallise. The milk is sterile, and contains no chemical preservatives. The flavor is good, and typical of rich,

This is the finest and purest milk to be had, and is most suitable for invalids and children; it is without that objectionable taste that most condensed milks have.

EAST AND WEST:

Important Speech by Lord Curzon.

Calcutta, February 15 .- Presiding, as

Chancellor at the Convocation of the

Calcutta University_to-day, Lord Curzon

asked his hearers to repudiate the theory.

that there was any idea on the part of Government to keep native talent in the background. Those who are energetic and capable, and who run straight, must come to the front whatever their extraction, for they are indispensable. He went on to ask how under these circumstances it was that Europeans with often but a fraction of the intellectual attainments of their Native competitors, so frequently distanced the latter, and found an answer in the British characteristic of energy when combined with integrity and sincerity. Be strenuous and you will 2219 not fail. There is no racial bar. Efficiency is the only test; these were amongst the maxims Lord Curzon uttered. From this consideration he went on to bid the young lawyer avoid hair-spliting and not to let words be his masters but to be master of his words. He told the man who goes in for teaching to realise the responsibility and dignity of his profession, and to endeavour to give his pupils better than what he had himself received in the way of instruction. The journalist, he reminded, that the being no respecter of persons was a very different thing from respecting no one, dwelling also

upon the fatal evils of exaggeration, and

summing up the mission of the press as

being not to inflame passions but to elevate

The Viceroy went on to sketch the rela-

tive parts played by the Native and the

the national character.

European in the development of India, and, speaking as an Englishman to an Indian audience, said : You cannot do without us, we should be impotent without you. The following are the concluding words of Lord Curzon's University address to-day; Out of this intermingling of East and West a new patriotism and a more refined and cosmopolitan sense of nationality are emerging. It is one in which the Englishman may share with the Indian, for he has THE HONGKONG LAND INVEST- helped to create it, and in which the Indian may share with the Englishman since it is their commonglory. When an Englishman 473 says he is proud of India it is not of battlefields and sieges nor of exploits in the Council Chamber or at the desk, that he is principally thinking. He sees the rising standards of intelligence, of moral conduct, of comfort and prosperity among the Native peoples. and he rejoices in their advancement. Similarly, when an Indian says he is proud of India, it would be absurd for him to banish from his mind all that has been and is 1478 being done for the resuscitation of his country by an alien race to whom has been committed its destines. Both are tillers in the same field, and both are concerned in the hurvest from their joint labours. It is that this new and composite patriotism is springing into life. It is Asian, for its roots are embedded in the traditions and aspirations of an Eastern people, and it is European because it is aglow with the illumination of the West. In it are summed up all the best hopes for the future of this country, both for your race and for mine. We are ordained to walk here in the same track together for many a long day to come. You cannot do without us, we should be impotent without you. Let Englishmen and Indians accent the consecration of a union that is so myster-

and let, our common ideal be a united 147 | country mid a hampier maple. air Raleigh afterwards spoke in his capacity of Vico Chancellor and sketched the objects of the Universities Commission over which he had been appointed to preside, explaining that the fact that Government had decided to investigate it was no reason for jumping to the conclusion that violent changes were intended. He went on to express the opinion that any 431 sudden raising of the standard for examinations would be foredoomed to failure, and mentioned such questions as those of the expansion of existing institutions into teaching as well as examining bodies and THE BUNGALOW 'CREGGAN,' at the the laying down of rules for teachers as amongst the subjects which would be look-

Stearns' Wine is noted for its promptness of action. It imparts tone to the organs, re-establishes normal functions and arouses vigour and vitality. It strikes at the very root of illhealth by building up nutrition, whereby new tissues are formed to replace those diseased and destroyed. It improves the appetite, stimulates digestion and enables the system to obtain its full quota of strength and flesh from the food. It enriches the blood and tones up the nervous system. These are no random statements but definite certainties.

BUBONIC PLAGUE.

HOW TO DESTROY RATS!!

BUBONIC PLAGUE is a Disease among Rats and Mice, and they being migrating animals the infection is carried from house to house. It matters not how perfect the Sanitary Arrangements may be, if Rats and Mice are permitted to remain about the Premises the disease can be contracted. The best safeguard is to destroy Rats and Mice.

NEWTON'S RAT CHEESE.

This is the only preparation ever compounded which will effectually rid your house of these pests, as well as keep the premises free from them.

All that is necessary to do is to sprinkle the powder about where rats and mice frequent, inside the holes or between floors The rats eat it and then seek the sewers for water, when death is produced.

With NEWTON'S RAT CHEESE it is not necessary to mix with any other substance to induce the animals to eat it, but sprinkle about according to directions, and the Rat Cheese does the rest.

The Rats will not die in the House after Eating NEWTON'S RAT CHEESE.

RATS AND MICE SPREAD DISEASES.

The fact has been scientifically established that rats and mice not only carry Bubonic Plague but also other infectious diseases, like Smallpox, Scarlet Fever, Diphtheria, etc. So the best protection against all such dangers is to keep rats and mice away from your house by using Newton's Rat Cheese. It is such a convenient article to use, no mixing with other See that you get the genuine NEWTON'S RAT CHEESE. substances is necessary.

EDITORIAL COMMENT.

We publish in another

EDUCATIONAL column the letter signed CHAOS IN Anti-Humbug 'not be-

HONEKONG, cause we have any royal ceremony. sympathy with the views expressed by the writer but to give the Government an opportunity of replying, if it is con sidered necessary, and to point the necessity of a speedy declaration by the Government of its, proposals for the reconstruction of the Education Departfunction the Colony. We happen to know (that 'Anti-Humbug's' letter is not distated by a spirit of hostility to the proposed school for the better-class Chinese, because of the social barrier it seeks to set up between class and class, but by a desire to see the local Chinese of every class placed on an equal footing; so far as equal opportunity to benefit from the educational facilities afforded. by the Colony's schools is concerned. It seems to us that there are two regrettable features of the present educational chaos in Hongkong. The first is the evident duplication and enormous waste of resources that is going on as the result of competing schools, some of is a menace to the peace of the Far East! them established by local philanthropists; | Nova vervous ! the second, the misapprehension that apparently exists in the minds of some Chinese in this Colony with regard to Westerneducation and the foreshadowed reforms in the Colony. We cannot, withhold admiration for the gentlemen who are so generously providing money for the better education of the Chinese They have set the Government an exto the Colony and those more immediately concerned. But since the Government has avowed its intention to reform the educational system of the Colonya much-needed reform; if all we hear by true-it would have been better had an attempt been made to cooperate with

the Government, with a view to prevent the repetition of the waste of resources that amounted to a scandal in Great we fear there will be a most lamentable waste, for schools seem to spring apdimost every week, and more are promised. The Government, by announcing its new proposals, without undue delay, might prevent some of this Black was in charge during the voyage rings most vigorously in front of the Eurosquandering of energy and resources, across, and, at the same time, remove the misunderstandings that have arisen in

Just as it is! undesirable that British boys and girls should sit side by side with Asim is in the public seasods of the Colony, we can obsceive reasons why the children Chinese professional gentlemen wealthy merchants should not be compelled to sit side by side with the children of Chinese coolies and servants. Democratic ideas of equality are very fine in theory, but they can be applied in Hongkong as in England only with baneful results; and if the ideas Anti Humbug introduces in his letter on education were applied religiously in the columns descriptive of the managerres everyday life of this Colony we have no of the French troops in the neighhesitation in saying that our correspondent would be the first to cry out. injustice is done in giving the children of all classes-so far as the financial resources of the Colony allow it-the environment most likely to benefit them | Annam was among the notabilities who from an educational and moral point of attended, being entertained by M. I move that a similar telegram be sent to the British Minister at Tokio as was sent to the Indian Government requesting that we may be granted the services of eight qualified medical men, three of them specially trained in bacteriology. It would be preferable for us to obtain the services of those who speak English, on account of the possible difficulty of interpretation .- Lt.-Col. Hughes seconded, and the motion was agreed to. The telegram which was sent afterwards stated that the doctors must speak English and must be obtained at once.

The C. P. R. It was stated by a contemporary, the other day, that 'official advices from the Canadian Pacific offices in Montreal have

been received to the effect that work is under way on the construction of four large steamers on the Clyde for service on the Oriental route between San Francisco and Hongkong. The new vessels are to take the place of the Empress liners at present plying on the route, while the latter heats will go on the Canadian-Australian run, now taken by the Minwera, Avrangi and Moana. The new steamers when completed will be up to the standard of the fast Atlantic liners and will surpass mything at present plying in Pacific waters. They will be 600 feet long, or ever 100 feet longer than the present Empress liners, and will have accommodation for 800 saloon and 1,200 steerage passengers. According to the terms of the contracts, which were signed in October, the speed of the new steamers will be 21 knots per hour, as against 16 knots of the present boats. The proposal is to inaugurate a ten-day service , between 'Frisco and Hongkong. Ir is probable that arrangements will be made for either a direct call or connection with the Siberian port of Vladivost ck. It is estimated that the new ressels will cost \$1,500,000 apiece. The Canadian Pacific directorate has voted \$2,425,000 for their construction. We have made enquiries at official headquarters in Hongkong, and we are informed that there is scarcely a statement in the foregoing paragraph that is not incorrect. No official advices have been received here from Montreal that

would give the slightest colour to the statements reproduced by our contemporary. The C. P. R. steamers have run hitherto between Hongkong and Vancouver, and it is not proposed to trade with San Francisco. A vote has been made for one new Empress, and two new steamers are being built for the Klondyke run and another for the Victoria, B.C., run. Nothing definite has been decided, we believe, with regard to the run to Vladivostock, and it is not atall improbable that the representatives of the C. P. R. who recently travelled over 5 Song..... A Wayside Posy Watson. the Siberian Railway may recommend that the time has not yet come for steamer connections between Canada and Siberia. From Estart to finish, there was not a dull moment · in the performance, and the majority of the songs were vociferously encored. Se veral 'locals' appeared on the stage, and added to the amusement. Ireland Defeats Scotland (Rugby). LONDON, February 23.

The International Rugby match at Belfast to-day between Ireland and Scotland produced an exciting struggle, which finally ended in a win for Ireland by one try to uit. There was a good gate. The marked features of the game were the magnificent forward play of the Irishmen and the grand defence of the Scotch backs. The Irish forwards were superb in their loose rushes, but the stubborn defence and the vigorous tackling of the excellent Scotch three-quarters proved over and over again equal to the occasion. Iroland was weak in the threeline, and the passing was poor. The game, was won by the Irish forwards, the mad impetuosity of whose rushes sometimes completely overwhelmed the Scotch for-
